Dominator Motor - Remote Program Instructions

1. **RESET** the opener by turning off the power point waiting 20 seconds & then on again.
2. Look for the button that says **PROGRAMME**
PRESS this button twice – **FOUR LED's** will flash on & off twice
3. Then **LED #1** will either flash or stay illuminated
If illuminated then a code is already been stored in that location
4. **PRESS** the **PROGRAMME** button to move to the next vacant coding slot indicated by a flashing **LED**
Up to 10 remotes can be stores in memory - Each memory location slot has a number assigned to it - LED#1 = Slot 1 - Combination of LED #2,3,4 = Slot 9
5. Once a free slot has been located; with the new remote **PRESS & HOLD BUTTON A** until **LED** stops flashing - the code has now been stored in that location
6. To reset **PRESS PROGRAMME** again to pass **LED #10** or wait 10 seconds for unit to reset automatically
